Full Stack Web Developer with experience designing, developing, and implementing new technologies to applications. Efficient problem solver driven to create user-friendly applications.

Built applications that used basic HTML/CSS/Javascript and others that dealt with more complex stacks like MERN.

TECHNICAL SKILLS

Languages: JQuery, Javascript

Applications: Xcode, Visual Studio Code, MongoAtlas, Heroku, Git, Github, REST API, GraphQL

Front End: HTML, CSS, Bootstrap, React.js, Tailwind Css, Bulma, Materialize, Handlebars.js

Back End: React, MongoDB, SQL, Sequelize, Node, Express

PROJECTS

Cosmic Records | Github: <https://github.com/bboyd146/cosmic-repo.git> | Deployed Link: <https://cosmic-records.herokuapp.com/>

- This project is an ecommerce site designed to allow music lovers and collectors to search and purchase vinyls to add to their collection.
- Core responsibilities includes: building server side models, typeDefs and resolvers, connecting database and Apollo with no errors. Client side tasks included building components and pages that load dynamically and communicate with server-side data.
- MERN stack used. React, Stripe, MongoDB, Node, GraphQL, and Tailwind ui

Workout Tracker | Github: <https://github.com/bboyd146/workout-tracker.git> | Deployed Link: <https://fathomless-depths-92066.herokuapp.com/>

- This Full-stack project is designed to allow a user to post and keep track of previous workouts. When the user hits the landing page, they are able to post a new workout and view their progress chart on the dashboard page.
- Core responsibilities include: building server side models, connecting to databases, and building front end pages.
- Express, Stripe, MongoDB, Node, REST, HTML, Javascript, and CSS

Progressive Budget | Github: <https://github.com/bboyd146/on-offline-budget-tracker.git> |
Deployed Link: <https://intense-mountain-44618.herokuapp.com/>

- This project is designed to allow a user to budget their finances by adding or deducting funds. This is a PWA which allows a user to have all functionality of the application on or offline.
- Core responsibilities include: building server side models, connecting to database, and building front end pages.
- Express, MongoDB, Node,HTML, Javascript, and CSS
